Objective

Ambitious Computer Science student with a specific interest in AI and ML, interested in applying my skill and knowledge in software development. Looking for an internship opportunity that would give practical experience, contribute to meaningful projects, and further professional growth.

Work Experience

Full-Stack Web Development

2022-2026

- Developed a responsive web application for a client management system that processed 1,000+ user queries daily; reduced response times by 50% and increased user satisfaction ratings from 70% to 90%.
- Created responsive pages and cross-platform apps with React Native.
- Enhanced server performance by fixing critical crashes.

Smart India Hackathon Participant

2023

- Built an environmental management platform with Node.js and MongoDB, supporting over 500 active users for waste reporting and tracking.
- Collaborated on the project with a team of 5, delivering a solution that improved waste management efficiency by 35%.

Microsoft Chapters Club Technical Team Member

2023

- Contributed to 10+ technical projects and workshops focused on emerging technologies, enhancing team knowledge and skills.
- Enhanced technical skills and collaboration through active involvement in the club.

Projects

Social Media Platform

2023

- Developed a fully functioning social media platform with features for journals, posts, community pages, and friends using Next js, Tailwind CSS, and MongoDB.

AI-Powered Product Discovery from Social Media Content

2022

- AI and NLP-powered platform that identifies Amazon products in social media content

Education

B-Tech computer science and engineering specialization in AI and ML

2022-2026

VIT-AP university, Andhra Pradesh, India

- current CGPA 7.91

Govt. Higher Secondary School, Panjal, Kerala, India

march, 2022

- Graduated with 91%

Skills & abilities

Hard Skills

- Languages: java, python
- Libraries: jQuery, Redux, React, Next js, framer-motion, NLP, TensorFlow
- Frameworks: Node js, tailwind, bootstrap, Express js
- Data base: MongoDB, SQL

Soft Skills

- Self-motivated and quick learner
 - Strong design thinking capabilities
 - Self active listener
 - Excellent time management
 - Leadership
- Version Control: Git, Github
